RE: FINDINGS FROM LATEST IOWA STATEWIDE SURVEY

The Tarrance Group is pleased to present the following findings from our recently completed survey of the Iowa electorate. The National Republican Senatorial Committee commissioned The Tarrance Group to conduct a telephone survey of N=600 voters statewide. A random sample of this type is likely to yield a margin of error of $\pm 4.1\%$ in 95 out of 100 cases. Sixty percent (60%) of all responses were gathered by cell phone. Responses to the survey were gathered October 15-19, 2022. As you know, this survey is one in a series of regular campaign updates scheduled well in advance.

Senator Grassley continues to enjoy an 11-point lead in our internal polling, a position that has been stable for some time. Grassley is capturing 61% of Independent voters in this latest survey. The Senator's image and job approval remain positive, despite Franken's increasingly negative campaign.

Also of note is that Governor Reynolds' ballot position continues to be slightly better than the Senator's, something captured in recent public polling.
